INTRODUCTION

What is Hero Floki token?

Running on the Binance smart chain, Hero Floki is the latest cryptocurrency to descend from meme dad DogeCoin. More specifically, it is a hyper-deflationary altcoin with a smart sharing system built into the ecosystem, so BUSD and CAKE are added to each user’s wallet. This means that cardholders automatically receive a 4% BUSD and 4% CAKE commission for every transaction that takes place on the HERO FLOKI network.

Hero Floki may be the latest meme coin craze whose value is about to explode. The coin is allegedly created by fans of elon musk and aims to improve transaction speed and 'worship'. The coin has a 5 second block time and generally cheaper gas rates compared to DOGE’s 60 seconds.

Hero Floki is still in its infancy, both in terms of project progress and market value. But progress is being made - and a succinct comment from Elon Musk has ignited enthusiasm around this new project dedicated to dogs.

Trying to capitalize on the huge popularity of Dogecoin, the ecosystem continues to grow rapidly. This continues to indirectly support its value and potential for DOGE memes. A potential and community leading him to also be listed on eToro (here for a free demo account), a broker that has 23 of the top cryptocurrencies listed and is also known for its CopyTrading - to copy the best ones or spy on their portfolios - and well-balanced crypto baskets for CopyPortfolios.

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the Binance Team called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

**Doge 1 Minute**

**Bep-20/BSC 5 seconds:**

**Advantages of the Binance smart chain are:**
It’s a sovereign blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It’s EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Hero Floki Token is not responsible for the actions of the Binance smart chain network
